MEDITATION SESSIONS

Meditation involves using specific techniques to focus on oneself, silencing the inner noise. It's a pause in our hectic, noisy, fast-paced daily lives—a moment to stop, reflect, and observe what's happening within us.

Delphine offers meditation sessions that incorporate breathing techniques, body scanning, visualization of an image, the use of a mantra, or focusing on an object.

Meditation is an ancient practice that originated in India over 5,000 years ago. It is suitable for everyone, including young children. However, individuals with psychiatric conditions are advised to consult their doctor before practicing.
